Audio System At New Club Hotel Nightclub In Greece By Eurosound S.A. Features EAW Avalon Series Loudspeakers

Whitinsville, MA – May 9, 2008 – Club Hotel, a new 500-square-meter nightclub in Greece, features a dynamic sound system designed and installed by Eurosound S.A. that features a variety of EAW Avalon Series club loudspeakers.

The nightclub offers a wide range of entertainment as the newest premier nightspot in Thessaloniki, the second-largest city in Greece and the capital of Macedonia, the nation's largest region. Eurosound S.A. is also based in Thessaloniki.

Already one of the largest and most prestigious club venues in the city, the high-end dance system at Club Hotel has an all-EAW loudspeaker line-up, headlined by six Avalon Series DC2 larger format full-range loudspeakers spaced throughout the club. These are joined by six more Avalon Series DC4 smaller format full-range loudspeakers, with both DC models offering cutaway upper-rear cabinet corners that allow them to tuck up next to the ceiling while being angled downward to provide optimum coverage.

Dual Avalon Series DCT1 supertweeter arrays deliver optimized 360-degree horizontal high-frequency dispersion from centrally mounted locations. Low-frequency energy to fill out the sonic spectrum is supplied by six EAW SB1000z dual-18-inch-loaded subwoofers. All loudspeakers are driven by Lab.gruppen amplifiers.

"The management of the club had first heard the EAW components in another club, and as a result of that dynamic demonstration of EAW quality, selected them for their own venue," notes Apostolos Kanakaris of Eurosound S.A.
