

**MH-115  
MODULAR HORN  
REPRODUCER**

Modular Horn Reproducer for large sound reinforcement and playback applications. This unit is virtually full range with limited response below 150 Hz, and is designed for use with sub-woofers like EAW BH-880, BH-800, VB-300, VB-318, and SB-528, for true full bandwidth response. The unit consists of a small single 15 inch vented bass horn (similar to the FR-350 bass horn) with integral MR-102 12 inch midbass horn, HF-590 high frequency horn and VHF tweeter mounting. This is ideal for applications where the distance between flying system and floor sub-woofers is too great to allow crossover directly into MR-102's. The effective low frequency crossover of 80 to 100 Hz maintains image stability regardless of sub-woofer to fullrange distance.

For many less demanding applications like sidefill monitoring, the MH-115 can be used very effectively without an additional sub-woofer.

**Performance Data**

Type: Four-way horn loaded upper-bass through high frequency system.

**Operating**

Range: 120 to 19,000 Hz  $\pm 3$  dB (-6 dB @ 70 Hz)

**Sensitivity**

1w @ 1m: 106 dB SPL

**Recommended Drivers:**

LF: EAW LF-384R or JBL 2225

MF: EAW LF-301R or JBL 2202

HF: JBL 2445 or RH SSD-3300

VHF: EAW 2070 or JBL 2405
