

SM-150
Series

These two-way monitors are built around a vented chamber for single 15 inch bass driver. The high frequency horn and optional tweeter mount on a removable panel, permitting a number of HF configurations and options. The standard configuration includes SM-151, which provides a one-inch entry horn and internal 1,200 Hz crossover with bi-amp switch and the SM-152 with two-inch entry horn lens. These systems are ideal for applications where maximum quality is desired in stage foldback applications. We can also supply an HF panel for a number of different horns and tweeter combinations.

Performance Data

Type: Slant Stage Monitor
Drivers Required
