

EAW TSP Program — FREQUENTLY ASKED QUESTIONS

Q: WHY SHOULD I LEASE ?

A: In today's economy, sometimes it just makes sense to lease rather than purchase. Growing companies need cash flow, and established companies need to be able to upgrade equipment on a regular basis. Leasing is a tool that helps businesses grow and stay competitive while avoiding the hurdles that normally confront them such as down payments, monthly finance costs and shrinking credit lines. Leasing allows you to tailor your expenditures to your revenue, making that all-important cash flow situation work to your benefit by increasing flexibility.

- **Leasing conserves working capital**

Leasing capital equipment does not require the use of your established credit lines. Conservation of your credit lines for investments or funding other business matters makes good sense.

- **Leasing offers tax savings and benefits**

With the EAW TSP Program, lease payments may be fully tax deductible as operating expenses (please check with your accountant)

- **Leasing is a hedge against inflation**

Instead of postponing equipment purchases due to lack of funds, and potentially losing jobs, leasing makes your needed equipment available immediately.

- **Pay as the equipment earns**

Maximize profits and cash flow by matching your lease terms to the expected utilization of your equipment. That way, your system can pay for itself as it earns.

Q: WHO IS ELIGIBLE ?

A: All EAW authorized dealers within the US are eligible to apply for the TSP Program. Each company's ultimate participation in the program will be based on the credit wherewithal of that company. As the purchaser of the equipment must retain ownership of the equipment for the entirety of the lease, this program is best suited for our touring systems customers at this time.

Q: IS A DOWN PAYMENT REQUIRED ?

A: Typical TSP program terms require one month's advance payment and a security deposit equal to one month's payment.

Q: WHAT ABOUT INSURANCE ?

A: For the protection of both U.S. Commerce and you, U.S. Commerce requires that the equipment be insured. Insurance is available through U.S. Commerce, or can be provided by your own insurance company.

Q: WHAT HAPPENS AT THE END OF THE LEASE ?

A: The EAW TSP Program has a One Dollar Buyout option at the end of the lease. Meaning once you have made all payments and fulfilled the entire term of the lease, **you may purchase all equipment specified on the lease for \$1!**
